Dear Lynda,

As the Chairperson and educational organiser of our Association, I wish to congratulate you again, on a truly professional, highly educational workshop you conducted for our Association and other carers, who attended from Associations further away.

Throughout the years I have been responsible for organising workshops and the education of Wildlife Carers, this also includes other types of Wildlife (Flying Fox, Birds). Your first workshop with our group was the best Macropod workshop any of kind my carers have attended, also your Manual has been a wonderful help to us all. I have also advised many a carer who has called me for help from other areas to purchase your manual, they have all rang and thanked me for telling them about it. I wonder if any carer has seriously looked at the manual and given any thought on how much first hand experience has gone to paper in such an understandable way, that any Macropod carer would relate to.

For you to come to us, on a number of occasions, each time a better workshop than the last, one wonders how you do it. We wish you were living closer as we feel a lot more could be learned from you. Wouldn't it be great if the Department of Environment would employ persons like yourself, who has the welfare of wildlife as utmost of importance, to educate us all, then think how many important lives would be saved.

Once again, thank you from all of us; we do hope it will not be too long before we are fortunate enough to have you helping us with any new discoveries.

We also wish you the best of luck on all of your endeavours.

Yours truly,

Paula Rowlands. (President) CWCAI.
